COVID-19 and the Job Market

Effects from the COVID-19 global pandemic have, at least temporarily, changed the job market. While many businesses closed or modified services during the month of March in order to stop the spread of COVID-19, several essential businesses began hiring to help meet health care demands and provide other vital services to the public. Missouri OneStart set up a new webpage to highlight essential businesses that are currently hiring to help displaced workers find employment options. Health care professionals, specifically respiratory therapists and technicians are being recruited to help the Missouri State Emergency Management Agency and its Missouri Disaster Medical Assistance Team (MO DMAT-1) to expand hospital and health care system capacity, including isolation and alternate care facilities. Economists and researchers are working to monitor and assess the long-term impact COVID-19 will have on Missouri's economy and job market.
